

The City of Richardson: Wildflower! Community Protection

The Challenge

Each May, The City of Richardson hosts the Wildflower Arts & Musical Festival - an award winning event that draws over 70,000 people to the City.

Spread over three days & six performance stages, more than 80 musical acts are showcased. With a crowd spread over a large area in a limited space, the City of Richardson required a flexible security solution that required little infrastructure.

The Solution

The WCCTV Site Tower was quickly chosen as the best solution for the City of Richardson. An integrated surveillance tower, designed for use on temporary or permanent basis.

The WCCTV site tower includes an IR PTZ camera, PIR motion sensors, two-way audio and LTE-connectivity in an easily transportable system. Offering multiple power options including Solar, the WCCTV Site Tower is suitable for autonomous deployment in off-grid locations.

The City of Richardson: Wildflower! Community Protection

The Result

Multiple WCCTV Site Tower provided the event organizers with a remote patrol enabling the festival to proceed in a safe & efficient manner. Each Tower relays video back to a command station where WCCTV Multi-View Software allows up to 64-cameras to be monitored simultaneously.

In addition to being able to quickly identify & respond to developing incidents, the 2-way audio functionality provided operators to the ability to remotely challenge suspicious behavior before incidents could develop.

The Quote

"The WCCTV Site Tower was a resounding success. We were quickly able to deploy cameras to remote locations without being constrained by power or communications."

"The WCCTV Site Towers were installed quickly by City employees and provided important coverage to event organizers and law enforcement throughout the event supporting those on the ground to provide a safe and enjoyable event for all."

Features & Benefits of the WCCTV Site Tower

- Proactive site protection and monitoring
- Up to 50% cheaper than security guards
- Wireless detectors provide an invisible perimeter
- Industry-leading ruggedized PTZ camera with IR capability as standard
- Multiple powering options for optimum flexibility
- Battery back-up activated and alarm raised on power disconnection
- Audio functionality
- Smoke detection early warning system
- Low battery alerts
- GPS location information
